## Identification

### SURVEY ID NUMBER

DDI-MNG-NSO-ENG-LFS-2025-v1.0

### TITLE

LFS-2025

### TRANSLATED TITLE

Labour Force Survey 2025

### COUNTRY

Name
Mongolia

### ABSTRACT

The LFS is aimed to generate official labor statistics required for implementation of economic and social planning and monitoring and LFS can represent the national, capital city and province levels. The LFS is the main source to determine the size and structure of the labor market and its changes in short-term. Generating a comprehensive dataset is significant for analysis, such as characteristics of the labour force, employment, decent work, informal employment, and labour underutilization. In addition, at the international level, LFS serve as the primary source for monitoring global commitments on the world of work, including under Goal 8 (Decent Work and Economic Growth) and Goal 5 (Gender Equality) of the 2030 Agenda for Sustainable Development.

### KIND OF DATA

Sample survey data [ssd]

## DATA COLLECTION NOTES

For the data collection of this survey, we used a modern technology that fully automated paper technology is tablet technology. In the first stage of data collection, the enumerators visited the selected households, met with each member aged 15 and over /face to face/ and through conversation and questioning by tablet. After data collection, supervisors and enumerators are checking, encode and transmit to the NSO's central server via the Internet. Upon receiving data in a central server, a survey team in NSO made logical and other checks for all data transmitted from the supervisors of local units and additional clarifications were received from the enumerators through the supervisors of local units.
